The Brooklyn Bridge Bookend is perfect for any civil engineer or bridge enthusiast looking for something to spruce up their shelves!

This model comes in 3 parts and various quantities:

- Bridge Anchorage x 1
- Bridge Tower x 1
- Bridge Cables x 3

The tower and anchorage are connected by the cables which should just snap into place for easy of assembly. I found I had to sand down some of the connection points for it to fit when I printed it.

I printed mine in PLA using the BIQU B1 using 15% infill. Will not easily scale down.
